

ALUMINUM SLING PATIO FURNITURE

CARE & MAINTENANCE and WARRANTY

Aluminum is a popular choice for patio furniture in tropical and wet environments due to its remarkable corrosion resistance. This resistance to corrosion makes it long lasting and easy to maintain. Aluminum's easy maintenance coupled with the fast drying sling material make this type of furniture long lasting and easy to own.

Care & Maintenance

Aluminum patio furniture should last a long time and with proper maintenance, even longer! Here are some of the basic things that can keep your furniture looking like new:

Always wear eye and skin protection to prevent liquid or other materials from entering your body while performing maintenance tasks as described here.

Soiling and Spills:

If you notice soiling or a spill, it is best to remove it right away. Large debris (like leaves) should be picked up by hand. Light soiling and dirt can often be removed by rinsing the product with fresh water and brushing it with a soft-bristle brush.

To remove stubborn dirt or stains from the frame or heavy soiling that has accumulated over time, clean the furniture with warm soapy water and use a soft bristle brush if needed.

Polishing:

To maintain the original luster on **smooth** finishes, use a fine automobile wax and follow the directions specified on the container. Try to avoid getting wax onto the fabric, as it is often times difficult to remove.

DO NOT USE A PRESSURE WASHER TO CLEAN YOUR FURNITURE. IT WILL VOID MOST FACTORY WARRANTIES. The force of the compressed water can damage or remove the finish and could harm the fabric. Tossing patio furniture in a freshly treated pool **IS NOT** recommended. This can cause long term problems for both your furniture and your pool!
